

IN THE SPECIFICATION

In the paragraph on page 1, lines 17-24,

Typically this consists of the dental professional forming a dental tray from an impression of a persons teeth. The dental tray is formed by any ~~by any~~ of the well known and well used procedures. After the dental tray is formed to the structure of the teeth a whitening formulation is placed in the tray and the tray placed into the mouth and against the teeth to be treated. The tray with the whitening composition in home use typically is left in the mouth for from about 10 minutes to several hours; ie. up to 12 or more hours. If the treatment is only in the dental office the time of the treatment typically will be from about 0.5 hour to about 2 hours.
